Opalescence®
tooth whitening systems

The leader in whitening

Many factors, including dietary habits (drinking coffee, tea, soda, and red wine) as well as certain medications, affect the dazzling brightness of your smile. Tooth whitening is an affordable and effective way to combat common causes of tooth discoloration, while boosting your self-confidence and improving your appearance.

Opalescence offers a diverse menu of products to illuminate your smile. With a Take Home option, Opalescence On-The-Go option, or Boost In-Office option, Opalescence Tooth Whitening Systems accommodate all lifestyles and budgets.

Prescription-strength Opalescence Tooth Whitening Systems are only available through your dentist. Stronger and more effective than over-the-counter teeth whitening products, Opalescence provides brighter, whiter smiles in as little as one hour.

Take Home, Custom Tray Whitening

Why Tooth whitening?

- Appearance of being more healthy
- Equated youthfulness
- Overall feel good feeling

Causes of tooth discoloration

External:

- Drinks (colas, coffee, tea, wine)
- Food colorants (beetroot, curries)
- Tobacco (cigarettes, chewing)
- Aging (thinning of enamel)

Internal:

- Drugs (tetracycline, fluoride)
- Trauma (Non vital tooth)

How does it work?

- Carbamide peroxide breaks down into hydrogen peroxide and urea, materials commonly found and readily disposed of in the body.
- Hydrogen peroxide breaks down into water and oxygen free radical

How safe is whitening?

- Hundreds of studies from the most credible researchers prove that there is:
 - No enamel reduction
 - No enamel softening
 - No damaging or alteration of tooth structure

Limitations

- Children younger than 16 years of age
- Pregnant or lactating women
